

# Storage

Roughly 30TB of data

G:  
VM Storage  
2.2TB / 16.4TB

~2.2TB

G:  
VM Storage/PCVFILE  
10.7TB / 16.4TB

~4.2TB

D:  
Backup Share  
18TB / 36TB

~10TB (8tb = veeam)

Cluster Shared Volume  
Cluster VM Data  
3.3TB / 14.3TB

~3.3TB

D:  
Shares  
3.4TB / 7.7TB

~3.5TB

D:  
Shares  
3.8TB / 9.3TB

E:  
Data  
0.155TB / 1.7TB

~4TB

D:  
Voiceshot Share  
0.25TB / 0.5TB

F:  
File Shares  
0.5TB / 1TB

G: (fixed disk)  
Phil Personal  
1.25TB / 8TB

~2TB

(Phil disk is configured as fixed 8TB)

# Storage Plan

Add faster SSDs to use as new shared cluster storage for VMs

Repurpose existing shared cluster storage for clustered file server

Existing disks continue for backup and lesser VM storage (Borg and Labwork)

What to do with local disk in nodes?
